Dear Twitpic Community - thank you for all the wonderful photos you have taken over the years. We have now placed Twitpic in an archived state. The Dodge Dart is an automobile originally built by Dodge from 1960 to 1976 in North America, with production extended to later years in various other markets. The Dart nameplate was resurrected for a Fiat-derived compact car introduced in 2013.. The Dart name originally appeared on a 1957 show car featuring a body designed by the Italian coachbuilder Carrozzeria Ghia. For 1986, there were three Turismos: base, Duster, and 2.2, and all of them were three-door hatchback versions of the Omni. The Duster added special bucket seats, wheels, and trim; and Turismo 2.2 added an air dam, side sill spoilers, sport suspension, close-ratio five-speed manual, performance exhaust, decals, and high-performance version of the 2.2 liter engine.
