Installing refrigeration piping ahr news, home installing refrigeration piping ensuring proper oil return is also part of the piping design oil traps other ways to I have been out of the field for about 15 years but now doing a little work here and there. This is only a 1hp tin can that uses 134a. the condensing unit will be outside on the roof. i have about 5 foot horizontal run and 10 foot vertical. i am using fan cycle. my question is do i need a oil trap (p-trap) on the low end of the suction line. The Refrigerant Piping Design program will select pipe size based on a specified maximum pressure drop in the line and compute minimum required capacity for oil entrainment in risers. The program eliminates all the tedious calculations necessary when piping is sized manually and automatically corrects for all system operating...
