

# Download Math Hands On Activities Elementary School

Hundreds of fun educational games and activities for kids to play online. Topics include math, geography, animals, and more. Build your own polygon and transform it in the Cartesian coordinate system. Experiment with reflections across any line, revolving around any line (which yields a 3-D image), rotations about any point, and translations in any direction. My class will be studying the concept of patterns for the entire year. During the first week of school I plan to introduce them to this concept and form the basis for an entire year's study. Here are some fun hands-on activities for teaching elementary school students about STEM (science, technology, engineering, and math).
